## 0.1 `current.packages`: Find all packages in a dependency chain

**Description**

Use `current.packages` to find all the packages suggested or required by a given package, and the currently installed version number for each.

**Usage**

```
current.packages(package)
```

**Arguments**

package      a character string corresponding to the name of an installed package

**Value**

A matrix containing the current version number of the packages suggested or required by `package`.

**Author(s)**
