## 0.1 `bivariate`: Sample data for bivariate probit regression

**Description**

Sample data for the bivariate probit regression.

**Usage**

```
data(bivariate)
```

**Format**

A table containing 6 variables ("y1", "y2", "x1", "x2", "x3", and "x4") and 78 observations.

**Source**

This is a cleaned and relabelled version of the sanction data set, available in Zelig.
